| Maximum Marks | 4 Marks |

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

10 minutes to prepare
1 hour to collaborate
2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

1

Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

2

Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

3

Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

Open article →

1 Define your problem statement

Scheduling a medical appointment can be time-consuming, confusing, and inefficient.

5 minutes

PROBLEM

Patients often face long wait times, lack of visibility into doctor availability, or struggle with finding trusted healthcare professionals.

Key rules of brainstorming

To run an smooth and productive session

Stay on topic

Encourage wild ideas

Defer judgment

Listen to others

Go for volume

As possible, be visual

Need some inspiration?

Start a 30-second sprint to generate ideas. We'll generate ideas for you.

Open workspace →

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

You can select a sticky note and hit the pencil (switch to DRAFT mode to start drawing)

Person 1

Person 2

Person 3

Person 4

Type your heading...

Type your heading...

3

Group ideas

We aim to streamline this process by providing a seamless, user-friendly platform for patients to discover, compare, and book appointments with healthcare professionals instantly.

🕒 20 minutes

TIP

- Real-time availability
- Location-based search

TIP

- Doctor Meters (ratings, experience, etc.)
- Appointment reminders
- Patient reviews and ratings

TIP

- Emergency booking
- Family member booking
- AI recommendations

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Importance

If each of these ideas could get done without any difficulty or cost, which would have the most positive impact?

Feasibility

(Regard time of time importance, which leads are more feasible than others? Cost, time, effort, complexity, etc.)

●

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

+

Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

+

Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint
 Define the components of a new idea or strategy.

Customer Problem Statement Template:

To define the core problems freelancers face while searching for jobs online, and use those insights to guide the development of Freelance Finder.

Customer Problem Statement Template

I am

I'm trying to

But

Because

Which makes me feel

A food enthusiast seeking hassle-free online food ordering

Order my favorite dishes smoothly and efficiently with minimal effort.

Food platforms often have limited options or confusing interfaces.

These systems are not designed for around the clock convenience.

Annoyed, restricted and unfulfilled by the lack of flexibility.

| PS ID | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|-------|---------------------------------------|---|--|--|---|
| PS-1 | a busy professional with limited time | order food quickly without long wait times or hassle | most food delivery apps don't show real-time delivery status or accurate restaurant availability | their systems are outdated or fragmented | frustrated and hungry while waiting |
| PS-2 | a local restaurant owner | manage incoming orders efficiently and reduce cancellations | my current order management is manual or not integrated with delivery platforms | I can't afford or understand complex restaurant software | stressed and overwhelmed despite working hard |

Ideation Phase

Empathize & Discover

| Project Name | OrderOnTheGo: Your On-Demand Food Ordering Solution |
| Maximum Marks | 4 Marks |

Empathy Map Canvas:

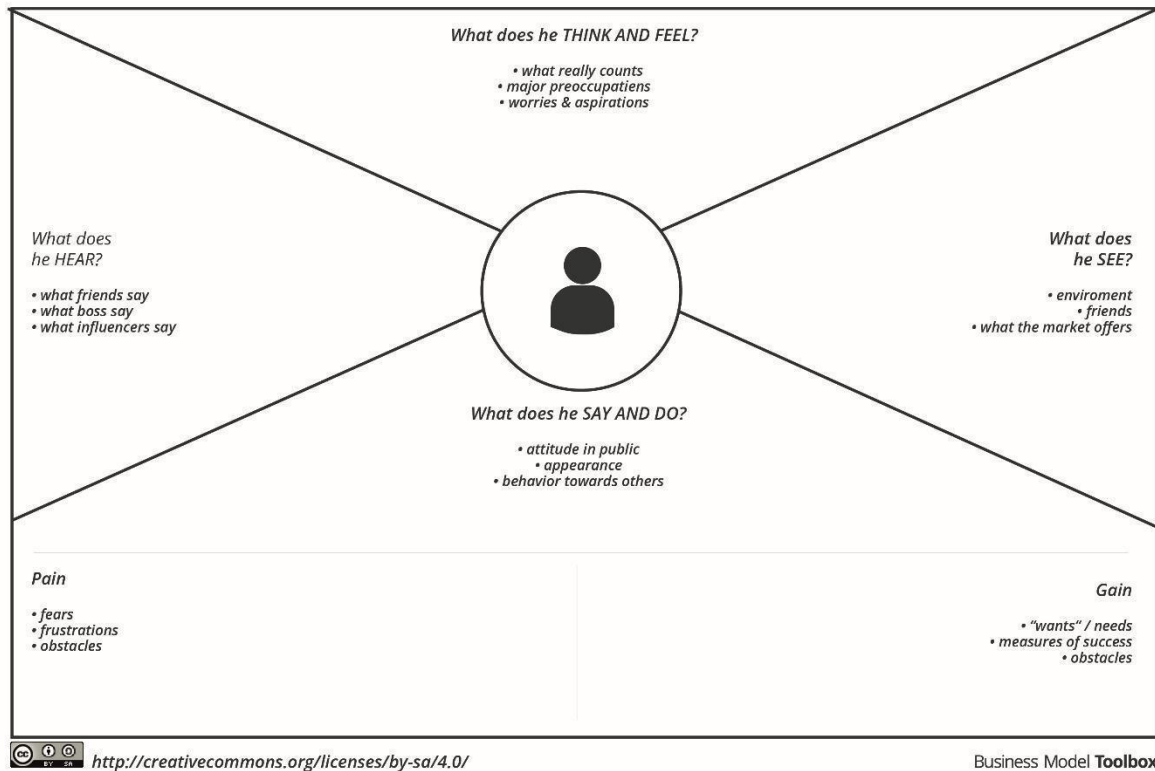

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Empathy Map

Reference: <https://www.mural.co/templates/empathy-map-canvas>

Example: LearnHub

Says

What have we heard them say?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

I want something that's open late and delivers.

Are there any good deals or promos I can use?

Person's name

Short summary of the persona

Browses the menu and places an order on a food delivery app

Relieved to satisfy their hunger late at night

Does

What behavior have we observed?
What can we imagine them doing?

Feels

"What are their fears, frustrations, and desires?"
What other factors might influence their behavior?

User Acceptance Testing (UAT) Template

| | |
|---------------|---|
| Date | 24 June 2025 |
| Team ID | LTVIP2025TMID53004 |
| Project Name | OrderOnTheGo: Your On-Demand Food Ordering Solution |
| Maximum Marks | |

Project Name: FoodieExpress

Project Description:

A user-friendly platform that allows customers to browse restaurants, place orders, track deliveries in real-time, and manage their food preferences. Features include restaurant search and filtering, real-time order tracking, secure payment integration, order history, ratings and reviews, and delivery scheduling.

Project Version: v1.0.0

Testing Period: 2025-05-26 to 2025-06-02

Testing Scope:

- Customer registration and login
 - Restaurant profile creation and menu management
 - Search and filter restaurants and dishes
 - Real-time order placement and tracking
 - Order modification and cancellation
 - Delivery scheduling and updates
 - Secure payment processing
 - Ratings and review system
 - Notifications (SMS/email) for order status
 - Admin dashboard for managing users, restaurants, and disputes
-

Requirements to be Tested:

- As a customer, I want to easily search restaurants and place orders with real-time updates.
- As a restaurant owner, I want to manage my menu, availability, and incoming orders efficiently.
- As a user, I want secure login, payment processing, and timely notifications.
- As an admin, I want to manage users, restaurants, and handle disputes or feedback effectively.

Testing Environment:

- **URL:** <https://foodieexpress.example.com>
- **Credentials:**
 - Customer: test.customer@example.com / customer123
 - Restaurant Owner: test.owner@example.com / owner123
 - Admin: admin@foodieexpress.com / adminpass

Test Cases:

| Test Case ID | Test Scenario | Test Steps | Expected Result | Actual Result | Pass/Fail |
|--------------|-----------------------------|---|--|---------------|-----------|
| TC-001 | User Registration | 1. Visit app/website 2. Click "Sign Up" 3. Fill & submit form | Profile saved Account created, redirected to home screen | [Pass/Fail] | |
| TC-002 | Restaurant Profile Creation | 1. Login as restaurant owner 2. Fill restaurant details & menu 3. Save | Profile saved, restaurant listed in search results | [Pass/Fail] | |
| TC-003 | Place Food Order | 1. Search restaurant or dish 2. Select items and add to cart 3. Confirm order and payment | Order confirmed and shown in user order history | [Pass/Fail] | |

Notes:

- Test across **multiple devices and browsers**.
- Cover **positive and negative** cases (e.g., invalid input, empty search, etc.).
- Track all bugs with reproduction steps and severity.
- Sign-off is required from the **project manager** and **product owner** before release.

Project Design Phase

Problem – Solution Fit Template

| | |
|---------------|---|
| Date | 24 June 2025 |
| Team ID | LTVIP2025TMID53004 |
| Project Name | OrderOnTheGo: Your On-Demand Food Ordering Solution |
| Maximum Marks | 2 Marks |

Problem–Solution Fit Overview: OrderOnTheGo: Your On-Demand Food Ordering Solution

The Problem–Solution Fit ensures that OrderOnTheGo: Your On-Demand Food Ordering Solution effectively addresses the challenges faced by customers and restaurant owners in food ordering and delivery. This validation is crucial before scaling the platform.

Purpose:

- Simplify and streamline the food ordering and delivery process.
- Provide a centralized platform for order and delivery management to avoid delays and errors.
- Enhance customer access to a wide variety of restaurants and dishes through smart search and filtering.
- Improve communication via real-time order tracking and notifications to reduce cancellations and complaints.

Problem Statement:

Customers and restaurant owners face challenges such as:

- Complex and time-consuming food ordering processes.
- Lack of real-time order and delivery tracking causing uncertainty and frustration.
- Poor communication and notification systems leading to missed or delayed deliveries.
- Difficulty in quickly finding available restaurants or specific dishes.
- Managing orders across multiple platforms or delivery services is inconvenient and inefficient.

Solution:

OrderOnTheGo: Your On-Demand Food Ordering Solution offers a seamless food ordering and delivery platform with:

- Easy search and filtering by cuisine, location, ratings, and availability.
- Real-time order and delivery tracking for customers and restaurants.

- Automated notifications and updates to keep customers informed and reduce cancellations.
- Secure user profiles with order history, preferences, and saved favorites.
- Integrated payment processing for a smooth checkout experience.
- Admin controls for managing users, restaurants, orders, and handling feedback or disputes.

| Maximum Marks | 4 Marks |

Solution Architecture:

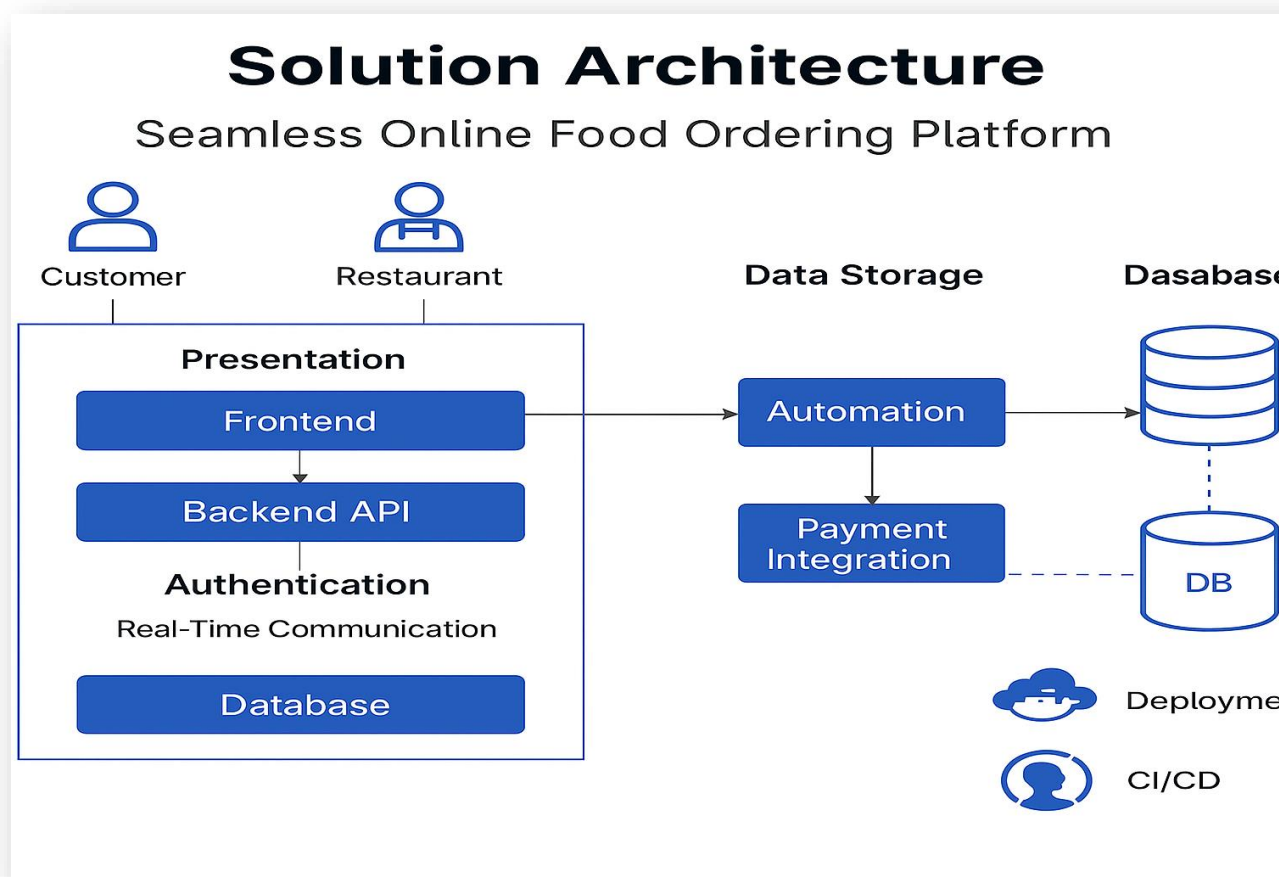

Vision:

To provide a user-friendly, secure, and scalable food ordering and delivery platform that bridges the gap between customers and local restaurants.

Key Features:

- **Effortless Food Ordering:** Simple and quick order placement with easy menu browsing and filtering.
- **End-to-End Order Management:** Seamless management of orders from placement to delivery for both customers and restaurants.
- **Scalable User Authentication and Authorization:** Secure login and role-based access for customers, restaurant owners, and admins.
- **Secure and Trackable Payment Transactions:** Safe payment processing with transparent transaction tracking.
- **Reliable Real-Time Notifications:** Instant updates on order status, delivery tracking, and promotional alerts via app, SMS, or email.

Problem–Solution Fit Overview: OrderOnTheGo: Your On-Demand Food Ordering Solution

The Problem–Solution Fit ensures that OrderOnTheGo: Your On-Demand Food Ordering Solution effectively addresses the challenges faced by customers and restaurant owners in food ordering and delivery. This validation is crucial before scaling the platform.

Purpose:

- Simplify and streamline the food ordering and delivery process.
- Provide a centralized platform for order and delivery management to avoid delays and errors.
- Enhance customer access to a wide variety of restaurants and dishes through smart search and filtering.
- Improve communication via real-time order tracking and notifications to reduce cancellations and complaints.

Problem Statement:

Customers and restaurant owners face challenges such as:

11. Complex and time-consuming food ordering processes.
12. Lack of real-time order and delivery tracking causing uncertainty and frustration.
13. Poor communication and notification systems leading to missed or delayed deliveries.
14. Difficulty in quickly finding available restaurants or specific dishes.
15. Managing orders across multiple platforms or delivery services is inconvenient and inefficient.

Solution:

OrderOnTheGo: Your On-Demand Food Ordering Solution offers a seamless food ordering and delivery platform with:

5. Easy search and filtering by cuisine, location, ratings, and availability.
6. Real-time order and delivery tracking for customers and restaurants.
7. Automated notifications and updates to keep customers informed and reduce cancellations.
8. Secure user profiles with order history, preferences, and saved favorites.
9. Integrated payment processing for a smooth checkout experience.
10. Admin controls for managing users, restaurants, orders, and handling feedback or disputes.
